ABOUT ME

An IT undergraduate with a strong interest in artificial intelligence, software engineering and programming. Focused on applying core concepts through academic and personal projects and aspire to contribute to community-driven initiatives that create meaningful technological impact.

EDUCATION

BS-INFORMATION TECHNOLOGY - University of Management and Technology / Lahore / 2028
Building expertise in programming, OOP, digital logic, discrete structures, web technologies, databases, and computer networks through coursework and hands-on lab projects.

ICS-PHYSICS - Lahore College for Women University / Lahore / 2024
Studied Physics, Mathematics, and Computer Science (C Language), gaining strong foundations in programming, logical reasoning, and problem-solving.

COMPUTER SCIENCE - American Lycetuff School / Lahore / 2022
Focused on Mathematics, Physics, Chemistry, and Computer Science, establishing core scientific and computing knowledge.

ASPIRE LEADERSHIP PROGRAM - Aspire Institute / Virtual / December 2025
Completed an international online program developing leadership, teamwork, communication, and digital collaboration skills.

Technical Skills

- Programming Languages: C++, Python
- Object oriented programming and Data structures
- Core IT and AI concepts
- Web & database development: HTML, CSS, JavaScript & SQL
- MS Office (word, excel, access)

Experience

Cyber-Security Workshop – American Lycetuff School / Lahore / Dec, 2025
Conducted an interactive cybersecurity workshop for 25+ junior students, covering online safety, password security, and threat recognition. Engaged participants through hands-on activities and real-life examples, enhancing digital literacy and promoting safe technology practices.

Certifications & Courses

- 360-degree transformation program – self-awareness & confidence (Certificate)
- Python Programming – (E-Certificate)
- Introduction to Artificial Intelligence – (E-Certificate)
- Introduction to Information Technology & AWS Cloud (E-Certificate)
- Introduction to HTML, CSS & JavaScript – (E-Certificate)

Projects

- Library management system (C++)
- Car parking simulation (Advanced C++ with OOP)
- Real-time chat system (C++ DSA)
- Smart home automation system (Python)
- My-Portfolio (HTML, CSS, JS)
