Alishbah Waheed

+92 302 4669967| alishbaw026@gmail.com | linkedin.com/in/alishbahwaheed | https://github.com/TheAlishbahWaheed |Lahore, Pakistan

Information Technology undergraduate with hands-on experience in Python, machine learning, full-stack web development, and software engineering through internships, academic projects, and open-source work. Skilled in building Flask applications, responsive web interfaces, and machine learning solutions, with strong problem-solving and collaboration skills. Seeking to apply AI/ML and web development expertise to deliver impactful real-world solutions.

EDUCATION

University of Management & Technology *Bachelor of Science in Information Technology* **Lahore, Pakistan | 10/2024 - 07/2028**
Core courses: Object Oriented Programming | Digital Logic Design | Data Structures | Assembly Language | Software Engineering | Database Systems | Computer Networks | Web Technologies | Open-Source Software Development | Professional Practices | Database Administration and Management | Information Security | Artificial Intelligence | Machine Learning |Operating Systems | Innovation and Entrepreneurship

Lahore College for Women University *ICS-Physics* **Lahore, Pakistan | 2022 - 2024**
Core courses: Physics | Mathematics | Computer Science (C Language/Database)

American Lycetuff School *Computer Science* **Lahore | 2009 - 2022**
Core courses: Mathematics, Physics, Chemistry, and Computer Science, establishing core scientific and computing knowledge.

Aspire Institute *Aspire Leadership Program (Virtual)* **Massachusetts, United States | 2025 - 2026**
An International online program developing leadership, teamwork, communication, and digital collaboration skills.

EXPERIENCE

Askari Bank *Banking Operations Intern* **Lahore, Pakistan | 02/08/2026 – 31/08/2026**

- Supported **daily banking operations, customer service, and transaction processing**, ensuring accuracy and timely assistance.
- Maintained **operational records and documentation** while following established compliance and banking procedures.
- Assisted with **routine administrative** and operational tasks, contributing to smooth day-to-day branch activities.
- Strengthened accuracy, teamwork, time management, and problem-solving skills in a professional banking environment.

FlyRank AI *AI Fluency & Machine Learning Intern* **Remote, Pakistan | 24/06/2026 – 31/08/2026**

- Developed responsive web interfaces using **HTML, CSS, and JavaScript** with AI-assisted development practices through hands-on assignments and **real-world projects**.
- Applied **AI tools** to accelerate frontend development, debugging, and code optimization while strengthening **modern web development and AI integration** skills.
- Developed machine learning models using **Python, data preprocessing, and supervised learning techniques** through hands-on ML projects and experiments.
- Applied **machine learning algorithms** for data analysis, model training, evaluation, and prediction while building **practical, portfolio-ready ML solutions** and improving model performance.

Foram Studios *Gaming Development Intern* **Remote, Pakistan | 22/06/2026 – 31/07/2026**

- Developed interactive game experiences using Unity and C# through hands-on game development projects.
- Applied **2D/3D** game development concepts, including gameplay mechanics, physics, animation, and scene management.
- Built portfolio-ready game projects while strengthening skills in **Unity, C#,** game design, and interactive development.
- Debugged and optimized gameplay systems, scripts, and scene interactions while troubleshooting technical issues and improving overall game functionality.

SKILLS

- **Programming Languages:** Python, C++, Html5, CSS3, JavaScript, C, Assembly Language, SQL, PHP, C#, MATLAB
- **Frameworks & Libraries:** NumPy, Pandas, MySQL, BeautifulSoup(bs4), Flask, Threading, Matplotlib, Scikit-learn, Requests, Bootstrap, JSON, Django, FastAPI, React.js, Next.js, Node.js
- **Tools:** VS Code, PyCharm, Jupyter Notebook, Git, GitHub, Git Bash, Google Colab, Cisco Packet Tracer, MongoDB, PostgreSQL

PROJECTS

Smart home automation system | *Full-Stack* | [Git-hub]

- Developed a responsive smart home automation dashboard using Python (Flask), HTML, CSS, JavaScript, and SQLite to manage connected devices.
- Implemented user authentication, device controls, interactive animations, and object-oriented programming principles including inheritance, encapsulation, abstraction, and polymorphism.

DSA Visualizer | *Front-End* | **[Git-hub]**

- Developed an interactive Data Structures and Algorithms Visualizer using HTML, CSS, Bootstrap, and JavaScript to demonstrate algorithm execution through real-time animations.
- Implemented Bubble, Selection, Insertion, and Merge Sort, along with Linked List, Stack, and Queue operations, with interactive controls and adjustable speed.

My-Portfolio | *Front-End* | **[Git-hub]**

- Developed a responsive personal portfolio website using HTML, CSS, JavaScript, and Bootstrap to showcase projects, technical skills, experience, and achievements.
- Implemented interactive UI components, animations, responsive layouts, and EmailJS-based contact and resume request features to enhance user experience and communication.

Reflecto Open-Source Project | *Python* | **[Git-hub]**

- Developed a Flask-based productivity and journaling platform using Python, HTML, CSS, and JavaScript with integrated journaling, task management, study notes, and mood tracking features.
- Implemented user authentication, productivity tracking, data export, customizable themes, and interactive dashboards to provide a structured and personalized user experience.

Google Search Ranking and Discoverability Capstone | *Machine Learning* | **[Git-Hub]**

- Developed machine learning pipelines for search-ranking analysis using Python, NumPy, Pandas, and Scikit-learn, including data preprocessing, feature engineering, model training, and evaluation.
- Implemented and evaluated Logistic Regression, Decision Tree, and Random Forest models using Scikit-learn and Matplotlib to analyze ranking performance and generate actionable insights.

TECHINICAL CERTIFICATIONS

- 360-degree transformation program | Certificate — *by University of Management and Technology*
- Python Programming | E-Certificate — *by FreeCodeCamp*
- Introduction to Artificial Intelligence | E-Certificate — *by Coursera.org*
- Introduction to Information Technology & AWS Cloud | E-Certificate — *by AWS*
- Cyber Security Analyst | E-Certificate — *by Forage*
- Anthropic Certs | E-Certificates — *by Anthropic*
- Aspire Leadership Program [E-Certificate] — *by Aspire Institute (Harvard University)*

ACHIEVEMENTS

Merit Scholarship for Bachelor's *University of Management and Technology* 10/2024

Received merit-based scholarship covering 25% tuition for 4 years, maintained through consistent academic excellence.

Academic Excellence *American Lycetuff School*

Consistently secured **1st, 2nd, and 3rd positions** throughout secondary school studies, receiving **multiple academic trophies/cups and gold medals** for outstanding performance.

LEADERSHIP COURSEWORK

American Lycetuff School *Cyber-Security Workshop - Team Lead* **Lahore, Pakistan | 09/12/2025**

- Conducted a cybersecurity workshop for 25+ students, covering online safety, password security, and cybersecurity threat awareness.
- Led hands-on activities and coordinated team responsibilities to deliver interactive sessions promoting digital literacy and safe online practices.

University of Management and Technology (UMT) *Digital Transformation Program - Team Lead*

- Led and mentored 100+ students throughout a three-week Digital Transformation Program, guiding their transition into university life and introducing university culture, academic expectations, and campus resources.
- Coordinated class activities, facilitated interactive sessions, and managed student engagement to ensure effective communication, active participation, and smooth program delivery.

RESEARCH AND PUBLICATION

Artificial Intelligence and Digital Governance: Opportunities, Risks, and Policy *Independent Policy Research Article* 08/2026

- Analyzed the opportunities and risks of AI adoption in digital governance, including public-service efficiency, data-driven decision-making, privacy, bias, transparency, accountability, and digital inequality.
- Compared AI governance approaches across the European Union, United States, United Kingdom, and UNESCO.
- Proposed policy mechanisms including risk-based regulation, algorithmic impact assessments, human oversight, transparency, independent auditing, procurement standards, and public participation.
